

MOHIT KHANDELWAL

Senior Full-Stack & Mobile Software Engineer | React, React Native, Next.js, Node.js | AWS & AI-Integrated Products

+91 9509959909 | mk14novm@gmail.com | Jaipur, Rajasthan, India | linkedin.com/in/mohit-khandelwal | github.com/mohit-khandelwal

PROFESSIONAL SUMMARY

Full-Stack & Mobile Software Engineer with 5+ years of experience architecting and shipping production web and mobile applications used by 200,000+ users across healthcare, gaming, ticketing, e-learning, logistics, and commerce platforms. Proficient across the full stack: React.js, Next.js, and React Native on the frontend; Node.js, Express.js, and Python/FastAPI on the backend; and PostgreSQL, Supabase, and MongoDB for data persistence. Independently architected and delivered a full-stack SaaS product end-to-end (React Native, Next.js, Supabase, AWS), including Stripe subscription billing, role-based access control, and a Gemini API-powered AI chatbot. Owns features end-to-end - from system architecture and API design through CI/CD and production support - with a consistent record of measurable performance, reliability, and scalability improvements.

CORE TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES2022+), Python, Kotlin, Swift

Frontend & Web: React.js, Next.js, React Native (CLI & Expo), HTML5, CSS3, Component-Based Architecture, Responsive Web Design, Redux Toolkit, Zustand, React Query, Recoil

Backend & APIs: Node.js, Express.js, Python, FastAPI, RESTful API Design, GraphQL (Hasura, Hot Chocolate), Firebase (Auth, Firestore, FCM), Microservice-Style API Contracts

Databases: PostgreSQL, MySQL, MongoDB, Supabase (Postgres, Auth, Realtime), SQL, Relational & NoSQL Data Modeling

Cloud & DevOps: AWS (Hosting, Messaging, Email Services), CI/CD (Fastlane, GitHub Actions, GitLab CI, Azure DevOps), CodePush OTA Releases, Docker-Adjacent Release Pipelines, Environment & Release Management

Mobile Engineering: React Native New Architecture (Fabric, TurboModules), Native Modules (Kotlin/Swift), Reanimated 3, FlashList, Offline-First Architecture, Live GPS/Location Tracking, Push Notifications (APNs/FCM), Deep Linking

AI Integration: Google Gemini API, Conversational AI / Chatbot Integration, Generative AI Feature Development

Practices & Testing: Clean Architecture, Payment Gateway Integration (Stripe, Razorpay), Jest, React Native Testing Library, Agile/Scrum, Accessibility (a11y), Role-Based Access Control (RBAC)

PROFESSIONAL EXPERIENCE

Anktech Software Pvt. Ltd. - Jaipur, India

Sep 2021 - Present

Software Engineer -> Senior Software Engineer (Full-Stack & Mobile)

Software engineering firm delivering production web, mobile, and full-stack solutions across client engagements spanning healthcare, gaming, ticketing, restaurant tech, e-learning, energy, digital publishing, and alumni networking.

iLant Health - Senior Software Engineer | Healthcare

Feb 2026 - Present

- Own end-to-end architecture of a cardiometabolic health platform serving 15,000+ patients, designing modular TypeScript components and scalable data layers for longitudinal health tracking.
- Engineered a Fastlane + CodePush CI/CD pipeline that cut iOS/Android release cycles from 3 days to 4 hours, enabling zero-downtime OTA deployments.
- Partnered with backend engineers on RESTful API contracts and HIPAA-aligned data handling; implemented deep-linked navigation flows that reduced patient onboarding drop-off by ~30% in UAT.

NESO - Software Engineer | Energy & Sustainability

Oct 2025 - Jan 2026

- Built new screens and features for an energy-efficiency mobile application, collaborating on API integration and state management.
- Led a full React Native upgrade from version 0.69.5 to the latest release, migrating the codebase to React Native's New Architecture (Fabric, TurboModules) across multiple breaking-change versions.

mbm connect & Palliwal Jain Digital Patrika - Software Engineer | Alumni Networking & Digital Publishing

Apr 2025 - Nov 2025

- Delivered mobile application features for mbm connect, an alumni networking application, as part of a client engagement.
- Built features for Palliwal Jain Digital Patrika, a community platform combining digital news/publication (e-patrika) content with matrimonial matchmaking services, as part of a separate concurrent client engagement.

Ticketsir & Ticketsir Scanner - Software Engineer | Global Ticketing & Event Check-In

Aug 2023 - Jun 2025

- Architected core platform modules - multi-role switching, real-time seat tracking, and dynamic pricing - for a ticketing platform serving 120,000+ events and 500,000+ users.
- Optimized GraphQL subscriptions (Hasura + Hot Chocolate) with normalized caching, eliminating 70% of over-fetching and cutting average API latency by 45ms.
- Built a high-throughput QR/barcode event check-in application with offline-first fallback (AsyncStorage), sustaining 1,200+ scans/hour at 99.97% accuracy across 50+ live events.

Kocha - Software Engineer | Gaming & Fitness

Jul 2024 - Sep 2024

- Maintained an existing production gaming/fitness application - resolved bug tickets and handled scoped maintenance work during a short-term engagement.

CokoBar - Software Engineer | Restaurant Tech & Events

Nov 2023 - Aug 2024

- Led development of a restaurant super-app - multi-gateway payments (Razorpay, Stripe), real-time seat reservation via WebSockets, and dynamic navigation - reaching a 4.4-star App Store rating within 60 days.
- Resolved FlatList performance bottlenecks via getItemLayout, memoization, and a Redux Toolkit migration, cutting render time by 60% and crash rate from 2.1% to 0.4%.

- Architected a Clean Architecture TypeScript codebase (domain/data/presentation) and collaborated on Express-based API endpoints for seat availability and order management.

Activi - Software Engineer | E-Learning & Commerce

Feb 2022 - Sep 2023

- Delivered a multi-role e-learning platform (learner, seller, instructor) with RESTful API integration and role-based navigation, cutting onboarding time by 40%.
- Integrated the Razorpay payment gateway and collaborated on Node.js backend logic for course enrollment, supporting 10,000+ monthly transactions within 3 months of launch.
- Built shared React.js UI components reused across web and mobile, cutting duplicate interface logic by 50%.

Almapod - Software Engineer | Alumni Networking

Nov 2021 - Feb 2022

- Shipped an alumni networking app (Android + iOS) in 3 months, launching at a 4.3-star App Store rating; implemented Firebase Firestore feeds and FCM notifications driving 65% Day-7 retention.
- Built 4 shared React.js components reused across web and mobile surfaces, contributing to a consistent cross-platform design system.

PROJECTS

Contract OS - Freelance Full-Stack & Mobile Engineer

Mar 2026 - Jun 2026

- Independently architected, built, and shipped a full-stack SaaS platform end-to-end - from requirements through production release - now live in Australia and New Zealand.
- Built a live GPS tracking system for heavy vehicles, streaming real-time location pings to an interactive map across a React Native mobile app and a Next.js web admin panel.
- Designed role-based access control for the web admin panel and implemented tiered subscription plans with Stripe billing.
- Integrated a conversational AI chatbot using the Google Gemini API as an in-app assistant feature.
- Owned the complete stack solo - Supabase (database, auth, real-time sync) and AWS (hosting, messaging, email services, CI/CD pipeline) - with full architectural and delivery responsibility and no engineering team.

Self-Directed Projects - Backend & Applied AI (Independent Learning)

- Built a Python/FastAPI backend implementing core REST patterns (authentication, login/logout, GET/POST endpoints) and a separate Gemini API-powered chatbot, undertaken to deepen backend and applied-AI skills outside of client work.

EDUCATION

Master of Computer Applications (MCA)

2020 - 2021

Rajasthan Technical University, Kota - SGPA: 10.0/10.0, University Topper

Bachelor of Computer Applications (BCA)

2015 - 2018

S.S. Jain Subodh P.G. College, Jaipur
